## Features:

MoonRock

MoonRock

### 5-POINT SUPPORT

The innovation of this support system lies in its comprehensive protection of the vertebra, and the absence of obstruction to body growth through weight distribution to the shoulder straps, sternum strap and hip belt.

### ACTIVE AIR FLOW™

With every movement your child makes, the smart breathable hollow-chamber foam generates air circulation, resulting in optimum back ventilation.

### MAGNETIC STERNUM LOCK

Easily locked and released by two fingers. The purpose of sternum straps is to keep the shoulder straps in comfortable position while the backpack is loaded. Through kid-friendly device that puts both parent and child's mind at ease.

### LIGHTWEIGHT

The MoonRock school bag takes pride in its minimal weight, carefully engineered to not compromise on durability and quality.

### SIDE COMPRESSION STRAP

Our solution for safer and more efficient weight-bearing is simple: by placing the bulk nearer your back for better weight transfer onto your back.

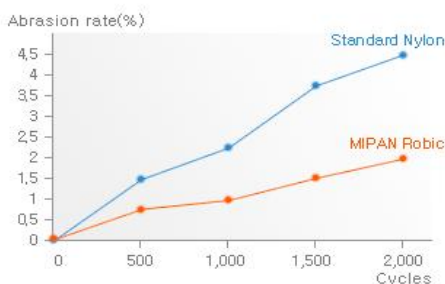

### 360° REFLECTIVE

With your child's safety among our priority, the MoonRock school bag is equipped with reflective material all around to ensure the user's visibility in poor light environment.

### ROBUST & DURABLE

MIPAN Robic Fabric is a High Tenacity Textile Yarn known for its durability. Resistance to Tears and Abrasion and Everlasting Look.

Abrasion Resistance of MIPAN robic

AFTER 2000 CYCLES

### Cleaning Instruction:

Use a mild soap (never use harsh detergent or solvents) and a damp sponge, wipe outside and inside the bag. Be sure to completely air dry the pack with zippers open/down before storing. Stubborn stains may require scrubbing with a bristle nylon brush. However, please note that excessive cleaning and heat may damage the protective fabric coating and is not recommended. Never clean your pack using a washer or dryer. Store your bags in a clean, dry place.
